Subject: IMPORTANT UPDATE: UL LISTED MAGLOCKS (1200 LB models)

To better serve you, we are transitioning BEA's 1200 LB models of the UL LISTED MAGLOCK and UL LISTED MAGLOCK WITH DS product families to comply with the International Building Code (IBC) requirements and to expand the scope of application.

Under Chapter 10, Means of Egress, the IBC requires electrified hardware to be UL 294 listed. Relevant applications include exit doors using a sensor or a switch in the door-mounted hardware to release the locking device – as well as particular units in healthcare facilities.

BEA's new 1200 LB MAGLOCKS will be listed under 'Burglary-resistant Electromagnetic Locks' and 'Access Control Unit Accessory.' The label on the new 1200 LB MAGLOCKS will include this language. Please see the image below for reference.

10MAGLOCK1UL depicted

We will be transitioning to the new 1200 LB models upon the exhaustion of our current stock with availability in February 2022. The product update applies to the following part numbers:

- **10MAGLOCK1UL**
- **10MAGLOCK5UL**
- **10MAGLOCK1ULDS**
- **10MAGLOCK5ULDS**

For warranty returns, BEA will substitute with the new model.

Please note we are also in the process of listing our 600 LB models of the UL LISTED MAGLOCK and UL LISTED MAGLOCK WITH DS product families. We will communicate the transition when available.

Get in touch with your BEA sales representative directly with any questions. You can also contact Customer Service by emailing orders-us@BEAsensors.com or by phone at **1-800-523-2462**.

Sincerely,

BEA
