

About .

RevGen Networks brings cutting edge technology to the table with our new 5G IQMC520 intelligent multi-carrier router. Alleviating the need for physical, single carrier SIM cards, the IQMC520 delivers carrier agnostic connectivity anywhere. This powerhouse delivers, which means, if you can get a cell signal, you can get high speed internet.

intelligent multi-carrier technology IQMC520

Who needs it.

The RevGen Networks IQMC520 is unlike any other device on the market today and provides best-in-class service when you need to access reliable, failsafe internet in any location! Providing mobile internet over the 4G/5G network, this portable multi-carrier router is great for remote workers, failover solutions, temporary events, security systems, internet deserts, or rural locations. The IQMC520 grants access to multiple carriers in a single router, providing true nationwide coverage without the hassle of physical SIM cards. The RevGen Networks IQMC520 supports "over-the-air" provisioning, which means simplified billing and easy device management. Whether on an enterprise, residential, or small business level, the IQMC520 provides the connection you need.

Product details.

- Nationwide coverage
- Available data plans include:
20GB-150GB-300GB-500GB-1TB-2TB-3TB
- 4G & 5G Modules available
- Automatically switches to the Carrier with most optimum coverage
- M.2 & miniPCIe limitless simple Cellular Module swap
- IQMC core central management platform
- Enterprise networking
- VPN
- Encryption
- Client end-point management
- End-to-end billing integration
- Complete API access
- 24X7 IQMC support with NOC
- SDWAN
- Remote end-point management
- Static IP available

About .

RevGen Networks IoT Universal SIM gives you nationwide connectivity for all your IoT and M2M devices. Utilizing a network of over 18 carriers, this roaming SIM will deploy anywhere on any network, without having to conduct a site survey or configure the hardware. It conveniently aggregates data from all cellular networks to provide one single IoT data plan, which eliminates individual device data tracking and makes billing super simple.

universal SIM

Who needs it.

Ideal for any business that needs data to support IoT and M2M devices and is scalable and simple to manage. The RevGen Networks Universal SIM provides access to multiple carriers in a singular Universal SIM card, providing true nationwide coverage without the hassle of multiple-carrier SIM cards. It also provides one single, affordable data plan for all connected devices. The Universal SIM saves time by eliminating individual device data tracking and makes billing super simple. The RevGen Networks Universal SIM supports “over-the-air” provisioning so that you can achieve nationwide IoT connectivity with one MNO.

RevGen Networks Universal IoT SIM will help you feel secure knowing that your IoT devices are connected no matter where they are deployed, as well as letting you reap the rewards of a simplified billing system. The Universal SIM allows you to focus on what matters most – growing your business!

Product details.

- Nationwide coverage
- Available data plans include:
5MB-1GB-3GB-5GB
- Preconfigured to operate with 5G and LTE networks across the nation
- Combined total cellular data usage from all carriers, across all devices
- Scalable with zero touch provisioning
- LTE-M and NB-IoT network technologies are ideal for IoT solutions such as fleet and asset management, tank monitoring, smart meters and other applications.
- Control and monitor devices from one platform

UNIVERSAL SIM

About .

Introducing the RevGen Networks Solar Surveillance Camera, designed for easy deployment and installation without extra power or complicated cabling. You'll receive strong, clear images with 4.0MP 2K 4G solar PTZ camera, along with a 6W solar panel for camera charging, 32 GB memory card, mounting brackets and our proprietary multi-carrier Universal Sim with 4 data plans to choose from. Using the UBox App, you can access notifications, wifi, pan tilt control, two way communication, and low bit rate H.265 video compression. The camera also utilizes a smart IR filter for day & night mode auto-switching, at up to 30M full color night vision. You'll also get PIR sensor & radar dual detection alarm, human motion detection, plus an inbuilt speaker & microphone for two-way audio (so you can see and hear what's happening around you from anywhere)!

SOLAR POWERED CAMERA

intelligent multi-carrier surveillance CAMERA

Who needs it.

The RevGen Networks multi-carrier camera is an exceptional technology for various business applications, thanks to its innovative features; from both a functionality and data provisioning stand point. Powered by our RevGen Networks Universal SIM, this multi-carrier data solution provides real-time location tracking with nationwide coverage, and one single affordable data plan for all connected cameras. It saves time by eliminating individual device data tracking and makes billing super simple. The RevGen Networks Universal SIM supports "over-the-air" provisioning so that you can achieve nationwide IoT connectivity for all your cameras, no matter where they are. This features allows you to position cameras where they are needed, switch locations when necessary, and keep your equipment connected...no matter where they are deployed!

Product details.

- Nationwide coverage
- Multi-carrier SIM automatically switches carriers to keep devices connected
- Available data plans include:
5MB-1GB-3GB-5GB
- 4.0MP 2K 4G solar PTZ camera
- H.265 video compression, low bit rate
- Smart IR filter, day & night mode auto switching
- Built-in warm LED & IR LED, smart dual light mode
- Full color night vision, up to 30M
- Pan tilt rotation, 360 full area surveillance
- Inbuilt speaker & microphone, two-way audio
- PIR sensor & radar dual detection alarm
- Motion detection with real time alert
- Multi-users remote access on smart phone
- Micro SD card (Max. 128GB) / Cloud storage
- Power: Inbuilt rechargeable battery (10400mAh)
- 6W solar panel for camera charging
- Low power technology, long battery life
- IP66 waterproof, suitable for outdoor/indoor use
- US 4G SIM LTE frequency band
- Simple to use APP to control via Smart Phone
- Available in Camouflage, White, and Black
